- Pfizer Vaccine: The full list of ingredients for the Pfizer vaccine is:
mRNA, lipids ((4-hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate), 2-[[poly(ethylene glycol)-2000]-N,N-ditetradecylacetamide, 1,2-Distearoyl-sn-glycero-3-phosphocholine, and cholesterol), potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose.
The Pfizer vaccine does not contain eggs, preservatives, or latex.
- Moderna Vaccine: The full list of ingredients for the Moderna vaccine is:
Messenger ribonucleic acid (mRNA), lipids (SM-102, polyethylene glycol [PEG] 2000 dimyristoyl glycerol [DMG], cholesterol, and 1,2-distearoyl sn-glycero-3-phosphocholine [DSPC]),
tromethamine, tromethamine hydrochloride, acetic acid, sodium acetate trihydrate, and sucrose.
The Moderna vaccine does not contain eggs, preservatives, or latex.
- Johnson & Johnson Vaccine: The full list of ingredients for the Johnson & Johnson vaccine is:
Recombinant, replication-incompetent adenovirus type 26 expressing the SARS-CoV-2 spike protein,
citric acid monohydrate, trisodium citrate dihydrate, ethanol, 2-hydroxypropyl- β -cyclodextrin (HBCD),
polysorbate-80, sodium chloride.
The Johnson & Johnson vaccine does not contain eggs, preservatives, or latex.

What Ingredients are in the COVID-19 Vaccine?

ct.gov/covidvaccine

Pfizer-BioNTech Vaccine

- **95% effective**
- Number of shots: **2 shots, 21 days apart**
- Approved for use in people aged **16 years and older**
- **Ingredients:** messenger ribonucleic acid (mRNA), lipids (((4-hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate), 2 [(polyethylene glycol)-2000]-N,N-ditetradecylacetamide, 1,2-distearoyl-sn-glycero-3-phosphocholine, and cholesterol), potassium chloride, monobasic potassium phosphate, sodium chloride, dibasic sodium phosphate dihydrate, and sucrose
- **Explanation of ingredients:**
 - Lipids: Nanolipids, or tiny fat molecules, protect the mRNA and provide a "greasy" exterior that helps the mRNA slide inside cells. Nanolipid components in the Pfizer-BioNTech vaccine include: ((4-hydroxybutyl)azanediyl)bis(hexane-6,1-diyl)bis(2-hexyldecanoate), 2 [(polyethylene glycol)-2000]-N,N-ditetradecylacetamide, 1,2-distearoyl-sn-glycero-3-phosphocholine, and cholesterol
 - Salts: Helping to balance the acidity in your body, the following salts are included in the Pfizer-BioNTech vaccine: potassium chloride, monobasic potassium phosphate, sodium chloride, and dibasic sodium phosphate dihydrate
 - Sugar: Basic table sugar, also known as sucrose, can also be found in the Pfizer-BioNTech vaccine. This ingredient helps the molecules maintain their shape during freezing.
- **Does NOT contain: Eggs, Preservatives, Latex**

Learn more, read the **FDA full Pfizer-BioNTech Fact Sheet:**
www.fda.gov/media/144414/download

Moderna Vaccine

- **94% effective**
- Number of shots: **2 shots, 28 days apart**
- Approved for use in people aged **18 years and older**
- **Ingredients:** messenger ribonucleic acid (mRNA), lipids (SM-102, polyethylene glycol [PEG] 2000 dimyristoyl glycerol [DMG], cholesterol, and 1,2-distearoyl-sn-glycero-3-phosphocholine [DSPC]), tromethamine, tromethamine hydrochloride, acetic acid, sodium acetate, and sucrose
- **Explanation of ingredients:**
 - mRNA: Like the Pfizer BioNTech vaccine, Moderna's also uses mRNA technology to build antibodies against COVID-19.
 - Lipids: Nanolipids help deliver the mRNA to the vaccine recipient's cells. Nanolipid components of the Moderna vaccine include: (SM-102, 1,2-dimyristoyl-rac-glycerol-3-methoxypolyethylene glycol-2000 [PEG2000-DMG], cholesterol, and 1,2-distearoyl-snglycero-3-phosphocholine [DSPC])
 - The remaining ingredients, including acids (acetic acid), acid stabilizers (tromethamine and tromethamine hydrochloride), salt (sodium acetate), and sugar (sucrose) all work together to maintain the stability of the vaccine after it's produced.
- **Does NOT contain: Eggs, Preservatives, Latex**

Learn more, read the **FDA full Moderna Fact Sheet:**
www.fda.gov/media/144638/download

Getting vaccinated is one of many steps you can take to protect yourself and others from COVID-19.

For some people, COVID-19 can cause severe illness or death. Getting vaccinated not only protects you from COVID-19, it also protects those around you by preventing its spread. Stopping a pandemic requires using all the prevention tools available. Vaccines work with your immune system so your body will be ready to fight the virus. Other steps, like masks and social distancing, help reduce your chance of being exposed to the virus and spreading it to others. **Together, COVID-19 vaccination and following CDC's recommendations to protect yourself and others will offer the best protection from COVID-19.**

1. The patent for a particle that carries the protein encoding for Sars Cov2, in addition to e coli, yeast, fungus, and pretty much every miserable thing any nefarious entity would want to have your body create, along with encoding for bioluminescence (luciferase), using Bacmam technology/CRISPR/Cas 9 that includes fetal kidney cell line HEK293, the most toxic cancer strain ~ HeLa and moth DNA (all of which is prohibited by Christians and Muslims alike). This substance is within Moderna as SM -102, and ALC-0315 from Acuitas Therapeutics in the BioNTech/Pfizer vaccine. It self- assembles in the presence of 5g is inscribed right there, and strangely was already tested before initial filing 11/27/2019. (See image on blog from 5/9/2024.) Bing [US20210262941A1 - Multipartite luciferase peptides and polypeptides](#) , Duck Duck Go [US20210262941A1 - Multipartite luciferase peptides and polypeptides - Google](#) . It is hidden away so we know it is important to consider. Patents are not supposed to be added to after the initial filing.

**It says that it was already tested as an envelope for SARS Cov2, and swabs prior to the pandemic and filing for patent on 11/2019. **

*The LNP penetrates the eukaryotes. (Cell nucleus)

SM102 is the key ingredient in both vaccine and PEG is specifically unpleasant:

27. Aside from the nanotubes, the ingredients in the inoculation illicit tiny biosensors formed within the body. This makes your body an Easy Bake Oven: <https://www.researchgate.net/topic/DNA-Origami/publications/6>

Refer back to the power point to see what fun is in store for you.

28. Have you ever heard of catching a cold through your arm? No, you know that vaccines don't stay where you inject them. They go systemic: <https://www.nature.com/articles/s42003-021-02441-2>

29. What can you do? Biodegrade the substance that the body will permanently produce with sunlight and sodium hypochlorite in purified water:

https://pure.manchester.ac.uk/ws/portalfiles/portal/184627389/FULL_TEXT.PDF

**We must be extra careful with misinformation and disinformation. There are politicians and actors that want to reduce some carbon footprints and keep us under control just as the wonderful leaders in Nigeria and Ghana with their new policing strategies using biotechnology platforms for their cashless commerce.

Look up:

James.Giordano @georgetown.edu

In addition to all their own government websites, you may reach out to Dr. Giordano for questions on ethics regarding newly named "biomedical devices" that were classified as agents of biological warfare delivery prior to the roll out and blessings of The Who and Pope working together to bring you your "Dose of Hope."

All the research indicates this is some form of bioweapons experiment rolled out upon the nations.

Here are more concepts to consider:

Biphasic binary bioweapon research is interesting. One part goes in the air while the other is within water.
